

AGGREGATE & SAND

We are the proud U.S. representatives to the newest facility in Mexico, supplying premiere Aggregate and Sand. With this modern facility, we can supply up to 1 million tons of aggregate and sand per year. The facility can produce various sizes from 3/4" to 2", and special mixes, as well as sand.

Located on the Yucatan peninsula, the facility is ideally located to serve the U.S. Gulf and East Coasts ports, as well as the entire Caribbean, Central and South America. Our high quality and competitively priced product is produced and shipped with the most modern and reliable equipment.

Our transportation services can deliver commodity via ship or shallow draft barge; all are capable of being self-discharged via grabs, conveyor or ro-ro ramp - direct, or as close as possible to the job site. The high quality limestone in the area ensures our great product.

The facility can load a vessel at up to 400MT per hour. We can supply your needs from 1,800MT up to 50,000MT shipments. We can quote you basis CnF and/or FOB.
